Slideshow * Photobooth Prints etc**

FAQs

What if we want something different?

Our packages are based on the most popular requirements and offer best value combinations of the different elements. We are very flexible and can provide you with our 'Pyxl Pick & Mix' brochure that will enable you to customise your package.

Tell us about the images?

We provide you with high resolution JPG pictures that are not watermarked and that you can use for your own printing purposes. All the images are edited and we take note of your preferences. Additionally, if we have a technically less superior image that we believe you may want we will give that to you as a low resolution image as we don't believe in unnecessarily discarding images.

How do you compile the photobooks?

We compile the photobooks detailing every aspect of your day in chronological order. Approximately 125 images will be included in a 50 page book. When booking the Emerald or Ruby packages, clients will be asked for their preferences.

What is a DVD Slideshow?

Your best images will be put into a slideshow on a disc that can be played in your DVD player. That way you can entertain your friends endlessly!

Are there any hidden extras?

No! What you see you pay. We absorb all travel and accommodation costs and VAT is not payable. We do ask that clients ensure that there is free parking available close to the venue(s)

How do we book?

We will send a booking form on request and will provisionally hold your date for a minimum of a week. We ask for a 20% deposit to be paid, and the form returned to fully book the date. Payment of the outstanding sum can be made any time up until 2 weeks before the wedding.

¹ dependant on the location of the groom getting ready

² Available for clients living within 50 miles of ourselves as determined by google maps
